PROFILE

Software Engineering student and full-stack developer with hands-on experience building web, desktop, and mobile applications using React, TypeScript, Rust, Kotlin, and Python. Experienced in collaborative development, end-to-end feature ownership, performance optimization, and practical troubleshooting. Built projects involving semantic search, cross-platform desktop software, on-device ML, Android, and Wear OS. C1 English proficiency and native Spanish speaker, with a strong interest in learning new technologies and contributing to technology teams.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Rust, Kotlin
Web & Backend: React, Node.js, Tailwind CSS
Desktop & Data: Tauri, SQLite, SQLite-vec
Mobile & ML: Jetpack Compose, Wear OS, TensorFlow Lite
Tools & Practices: Git, GitHub, Docker, AWS Fundamentals, AI-assisted / agentic coding workflows

PROJECTS

MAGI - Cross-platform semantic file search GitHub

Tauri, Rust, React, TypeScript, Tailwind CSS, SQLite, SQLite-vec

Built a desktop application that lets users find files by meaning instead of filename, combining a Rust/Tauri core, React interface, and local vector search.

AloMedia - Collaborative web video editor GitHub

React, TypeScript, FFmpeg

Contributed to transitions and effects, the export pipeline, QA, and performance optimization in a web-based video editing application.

Sophiel - On-device Android visual safety layer

Kotlin, Jetpack Compose, TensorFlow Lite

Built an on-device Android safety layer that captures the screen through MediaProjection and masks flagged content locally without sending data off-device.

HapticWash - Wear OS hygiene coach GitHub

Kotlin, Jetpack Compose, Wear OS, TensorFlow Lite

Built a wearable application that uses wrist-motion sensing to detect which handwashing steps were completed.

EXPERIENCE

IT Support Volunteer Pasto, Colombia
2023 - Present

- Provide hardware and software troubleshooting for non-technical staff at a local business and for college colleagues.
- Translate technical issues into clear, non-technical language and help users understand practical solutions.

EDUCATION

Universidad Cooperativa de Colombia Pasto, Colombia
BEng in Software Engineering (In Progress) Expected June 2028

Cambridge Academy of Languages Pasto, Colombia
English Language Program - C1 Proficiency Certification

CERTIFICATIONS

AWS Cloud Practitioner Essentials • C1 English Proficiency - Cambridge Academy of Languages
